Volume 12 | Issue 1
January - March 2023

A quarterly scientific refereed e-Journal of Ela Foundation and Forest Department, Maharashtra for Nature Conservation through Education and Research

Listed in UGC- CARE

Special Issue
Cumulative Index
of volumes - issues
2012-2022

Editorial

In four separate issues of Vol 12 (Issue 1 to 4), 2023 of the '*Ela Journal of Forestry and Wildlife*', (EJFW) four different indexes are cumulated and presented for the duration of past 11 years from 2012 to 2022. The various indexes include years wise indexes for the past 11 years in Vol 12, issue 1, subject index of papers in Vol 12, issue 2, author – citation index and names of authors index in Vol 12, issue 3 and country, state and district/place index in Vol 12, issue 4.

The year wise cumulative index in chronological sequence cites all the papers published in that year for the past 11 years in Vol 12, issue 1, including names of authors, volume, issue and pages. In the next issue, each paper is categorized as per the subject in alphabetical sequence on which it was focused, and the cumulative index in Vol 12, issue 2 presents this data for the past 11 years. In Vol 12, issue 3, in the first section, names of all contributing authors in alphabetical sequence are presented including first author and the co-authors. In the next section authors and names of papers, volume, issue and pages are presented for the past 11 years. In the next cumulative index Vol 12, issue 4, names of countries in alphabetical sequence from where contributions to EJFW were published are presented. At national level, Indian state-wise list of contributions is presented and in the final section, district/place list is presented. Maps are shown to depict these countries, states and places.

Total number of 312 published papers are included in the 11 years cumulative index for 2012 to 2022. Total number of 22 subjects are included. Total of 553 first authors and co-authors have contributed their research communications / papers to '*Ela Journal of Forestry and Wildlife*' during the years 2012 to 2022. We have received papers from 17 countries worldwide, 19 Indian states and 73 districts/places from India.

I take this opportunity to express my gratitude to the panel of referees and subject editors, guest editors, publication staff and website technical staff, who have helped me unconditionally to improve the standards of the papers published in our journal which has UGC Care index. I am particularly obliged to Dhanashree Athavale, Mohan Bharatiya and Dr. Nivedita Pande for their untiring efforts in generating this cumulative index.

I express my gratitude to the Maharashtra Forest Department for their whole-hearted support in this important scientific endeavor. I am thankful to all the contributing authors for their support. I look forward to their future valuable contributions in forestry and wildlife research and conservation.

The purpose of '*Ela Journal of Forestry and Wildlife*' is to promote research and assist authors from various parts of our country and worldwide to showcase their research findings in an accepted scientific format, for the conservation, protection and enhancement of our natural heritage. Conservation needs the strong foundation of scientific research. We attempt to contribute to this foundation to promote nature conservation for our future generations. The purpose behind the publication of any cumulative index is to present a summary of the publications in a given period for the convenience of the readers and authors for quick referencing. I am glad to present four special issues of Volume 12 (Issues 1 to 4), 2023, focused on cumulative indexes after completion of 11 years of the publication of '*Ela Journal of Forestry and Wildlife*'.

Prof. Dr. Satish A. Pande

MD, DNB, PhD,

Fellow of Maharashtra Academy of Sciences,

Fellow of the Linnean Society of London.

Editor-in-Chief
